

Hw8 (final assignment)

- A small project about enhancing (or novel) text (word/phrase/sentence/document/etc) embeddings
- You have three weeks to do it
- Required submission is an essay (short paper) about your work
- Suggestions
 - Similar to a normal academic article, you should include motivation (why you have to do it, what is enhanced), studies related to your model (approach), model (approach) details, performance (data and tasks), conclusion, which can be short
 - You are not encouraged to do duplicate work of existing ones (you can do it, but it will affect your credits), and within the first week you can discuss with me on your proposed model (approach)

Hw8

- For the last class, we will be in a seminar mode and we will do three things:
 - Discuss your work and preliminary results (if applicable)
 - Discuss the topics and questions you would like to do with me and your classmates (you can use the two weeks to prepare them)
 - Discuss previous assignments
